## MATERIAL HANDLING PRODUCTS

Instant Norway AS offer a wide selection of material handling products within categories such as waste handling and tool handling. All products are robust, user friendly and easy to transport.

Our material handling products have extremely good quality and cost-effective solutions. All products are CE marked.

## WASTE HANDLING

Waste in the workplace can require unnecessary space. In addition, a lack of waste handling can entail a big safety risk.

Instant's waste handling products are robust utilities that are very easy to use and ensure quick and efficient removal of all waste.

### *Waste bin 360l*

---

Flippable waste bin, manufactured due to demand from major construction and hire companies. Ideal for on-site and industrial recycling systems. The bin is equipped with two large rubber wheels and two swivel wheels with a nylon track. A pedal-operated brake will lock the two large wheels to allow easy tilting. Additional lifting handles for improved grip during emptying, and four strong lifting points (lugs) allow lifting by crane. Edge strips in rubber. Removable wheels.

### *Waste bin 400l*

---

Flippable waste bin manufactured due to demand from major construction and hire companies. Ideal for on-site and industrial recycling systems. The bin is equipped with one swivel wheel and is easy to handle even when it is heavily loaded. Extra lift handle for improved grip during emptying, and four strong lifting points (lugs) allow lifting by crane. Edge strips in rubber. Removable wheels.

### *Avfallscontainer 3200l*

---

Self-tipping waste container. Ideal for use at construction sites and as a recycling container. Crane operator can empty the skip without assistance, both saving time and avoiding the risk of crush injuries during tipping. The waste skips can be stacked on top of one another, and can also be lifted by a truck.

## TOOL HANDLING

### *Tool container*

Heavy-duty tool containers for secure storage, with a padlock locking system. Four lifting points (lugs) allow lifting by crane. The containers have an extra shelf as well as two fixed and two swivel wheels, all removable. Additional handle allows for easy maneuvering by one person. Available in two different sizes; standard and jumbo (l x w x h: 95x60x68 cm and 102x69x89 cm).

### *Bolt container*

An excellent helping device that simplifies the handling of small, heavy parts. Often used during the assembly of bigger scaffolding. Can be lifted stably and safely by a crane and requires minimal space. The conical shape of the containers allows for storage/stacking on top of each other.

### *Mounting support*

Our robust adjustable mounting support / wall support are constructed for light walls. With movable end pieces and an adjustable length, they can be used in most places. The length is adjustable from 210-320 cm with tweaking at 24 cm.

## LONG FREIGHT TRUCKS

Custom-designed trucks for transportation of long freight goods such as pipes, timber, etc.

### *Stacking macs*

Our unique patented stacking macs are both robust and versatile. The trolley has 4 shelves for temporary or permanent transportation of pipes, strips, planks and the like. It can be folded and is also very stable and easy to maneuver. Stacking macs have a height of 155 cm, but can be put together to a practical 45 cm when not used.

### *Pipe cart*

Instant's pipe cart is a new and unique way to transport pipes and long freight. The cart is designed so that you do not have to lift heavy to load the cart, avoiding strain and pinch injuries. In addition to transporting pipes or other long freight, the cart's dense bottom makes it possible to be used as a cart for other items or products.

## BOARD AND SHEET HANDLING

The handling of boards and sheets can be done in a time efficient and cost-effective way. We offer a number of helping devices that all simplify the assembly and handling work in the construction industry.

### *Board and panel trolley*

Ideal for transport of all types of construction boards and panels, doors, windows, etc. The trolley has two large center wheels for maximum flexibility in transport position, also on uneven surfaces. With a simple maneuver, the trolley can be transformed into a work table with correct working height. Four swivel and lockable wheels ensure that the trolley can be moved in this position as well. The trolley is easily operated by one person, and will fit through standard doors. Supplied with combination table for 900 mm / 1,200 mm plasterboards or 900 mm boards only. Can carry up to 13 plasterboards.

### *Plasterboard pump cart*

Hydraulic raising and lowering for hassle-free use in combination with our plasterboard trestles. Excellent for transport of panels and boards as well as other types of on-site transport. 4 wheel steering allows for maximum flexibility also in narrow passages. Parking and transport brakes.

### *Turntable carts*

Transport trolleys with a big capacity for easy handling of all types of building materials as well as other products. 4 wheel steering allows for maximum flexibility in narrow passages. Available in two different sizes. (l x w x h: 155x67x50 cm and 202x90x50 cm).

### *In-lift frame*

The in-lift frame is a robust steel construction that lifts and transports plasterboards from ground level to any desired height. The in-lift is easily connected to a crane with the help of lifting chains, and has a loading capacity up to 2,500 kg.

### Plasterboard trestles

For storage of plasterboards (or other construction panels) at the correct working height. Can be used in combination with the plasterboard pump truck/ elevating turntable truck. Practical fold-down construction for easy storage. Also available with frame for 100 trestles.

### Plasterboard / roofing sheet lift

Indispensable tool for fixing plasterboards or other sheeting to the ceiling. The board is placed on a lifting frame and is raised or lowered at infinitely variable speed by using the wheel. Five 125 mm wheels allow for easy maneuverability and correct positioning. Delivered with lifting frame for sloping roof.

### Plate holder

The plate holder is an effective and easy helping device in the assembly of plasterboards. By lifting and pushing the plasterboards towards the wall and up against the roof, the plate holder ensures greater precision when it comes to wall mounting. The product also frees the hands of the worker during assembly, making it possible to perform other tasks simultaneously.

## DOOR AND WINDOW HANDLING

Custom built helping devices for the transportation and handling of doors and windows. Easy to maneuver and transport with minimal strain on the operator.

### Door and window trolley

Practical trolley for transport of windows, doors and boards. With a simple maneuver, the trolley is lowered to floor level for loading/unloading. An easy-to-use locking system keeps the goods secure during transport. Can be folded and is easily operated by one person. Prevents back and shoulder strain, and reduces the risk of damage during transport.

### Door lifter / slide bars

A practical helping device for assembling industrial doors. Its telescopic handle ensures correct working position whilst preventing back injuries during both the assembly and disassembly. What used to be a job for two can now easily be done by one person. 160 mm wheels in nylon prevent marks and damage to the floor. Ideal for use in combination with the door lifter.

*The INSTANT brand has been known on the Norwegian market for about 40 years. Norway's leading rental shops, large government agencies as well as a vast number of entrepreneurs and contractors are among our faithful and satisfied customers.*

*Scaffolding products and INSTANT scaffolds in particular, have traditionally been, and will continue to be, a very important business area for us. However, we have broadened our range of products, adding facade scaffolds, lifts, material lifts, pedal lifts, building fences, walkways and material handling products also known as Blue Products.*

*Our main objective will always be to deliver high quality products at reasonable prices. We know that quality is essential for safe and secure operation.*

*Thus, our slogan: Our Quality - Your safety.*
